

THIS WEEK'S NEWS

COVID-19 Updates

Deep Cleaning

Our classrooms and bathrooms have been scheduled to undergo deep cleaning services. Bathrooms will be cleaned on 3/20 and each classroom has been cleaned and marked with a sign. Classrooms are sanitized again after people have entered them.

Temperature Taking

On 3/18, we were instructed to monitor the body temperature of every person entering our building. All staff, vendors, and parents wishing to enter our building are asked to complete the **temperature taking form** - (link available on our website). Our goal is to take every precaution in hopes of being prepared the moment we learn that the school building is open to the public once again.

Homework Packets

Classroom teachers have prepared "homework packets" which include work that your student can complete at home.

UPDATES

Last Thursday, Governor DeWine shared news that changed so many of the plans that your child's classroom teacher and our school's administrative team put together to prepare your child to learn, test well, and to grow socially and emotionally. Our routines have been completely destroyed, and we are all looking to find a "new normal". Unfortunately, as we learn more, there is more that becomes uncertain. There are many questions for which we have **NO ANSWERS** at this time. We will share as much as we can as we learn. We will send this newsletter out weekly.

Useful Links and Resources

Our counseling team, teachers, School Board, and community partners have put together a comprehensive series of links that families have reported as being very beneficial. several helpful

Virtual Classrooms

We miss having your children in school. Many of our teachers are using technology to remain connected to your student(s). You may have even been a part of an online class, Google Video Chat or a Facebook Live Video with them. We appreciate your willingness to adapt, and to embrace the use of technology as a means of staying connected as a class and as a school community.

Sadly, we know that not every family has access to technology at home. Please complete the COVID-19 Survey found on the CPA website so that we can work to support those who may need assistance with gaining access to technology at home.

This survey can be under the COVID-19 tab on our school's webpage or it can be found here: <https://forms.gle/NPDXf7cJ6SDPpbtdA>

Continued From Column 1

Teachers are working to support the learning of our students while they are at home and at this time assignments will not be graded. Current assignments serve to keep the students in a healthy routine and to help them to maintain academic gains that they have worked hard to attain this year.
